

1 Oxide Architecture Mission

Oxide provides architectural solutions and structural methods that are sensitive to societal and environmental well-being while attending to the dreams and needs of our individual clients. We architect-build spaces that strive to find a balance between modern and sensuous; sustainable spaces that invite people to enjoy and discover delight and vitality in the honest expression of material, form, and place.

Please contact us with any questions that you may have and to learn more about how we might work together.

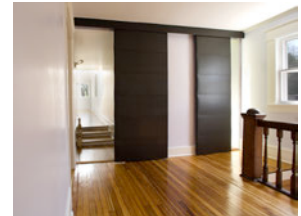

MODERN

We architect-build sensuous, sustainable, and modern places

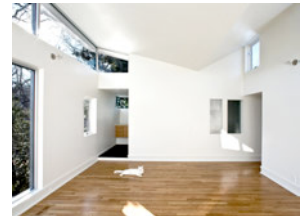

WELL-CRAFTED

We work with craftsmen for an artful process and product

HONEST

We trust in the honest expression of material and place

INSPIRED

We are inspired by how you live in places we create together

ORGANIC

We believe in the delight of discovering natural surroundings
